

Can you wait another five years for ICANN to develop a centralized process to get access to Whois data? Are you still waiting for the next round of new gTLD applications to open, something ICANN suggested would occur within two to three years of the first launch in 2012? Whatever resulted from ICANN's review of its rights protection mechanisms such as the Trademark Clearinghouse and the URS? And is the UDRP being revised? Come get the latest scoop on all things ICANN from veterans who have been practicing in this complicated space.
