

Dax Hansen hosted the "Regenerative Agriculture Crypto Acceleration Luncheon Roundtable" during the Consensus 2022 Roundtable Sessions in the Austin office. The presentation brought together blockchain industry leaders and regenerative agriculture pioneers for an organic farm-to-table lunch, where attendees learned about regenerative agriculture and had an opportunity to share their views on how crypto can accelerate regenerative agriculture.

Regenerative Agriculture Crypto Acceleration Luncheon Roundtable

Friday, June 10, 2022
12:00 p.m. – 2:00 p.m. CT

Agenda

- 12:00 p.m. – 12:20 p.m. Welcome by Dax Hansen and Participant Introductions
- 12:20 p.m. – 12:40 p.m. Regenerative Agriculture Introduction and Overview of Regenerate America Campaign – [Ryland Engelhart](#), Co-Founder, [Kiss the Ground](#)
- 12:40 p.m. – 1:30 p.m. Crypto Regenerative Agriculture Product/Service Presentations, including:
- [Agrotoken](#): Agrocommodities Tokenization Infrastructure and Payments – [Eduardo Astrada](#) and [Ariel Scaliter](#), Co-Founders
 - [G-Coin](#): Financial Inclusion, Payments, Cash In/Cash Out – [Brent De Jong](#), Founder
 - [Coinme](#): Remittances and Wallet Services – [Sung Choi](#), SVP Strategy
- 1:30 p.m. – 2:00 p.m. Open Roundtable Discussion

Letter from Dax Hansen

Dear Friends:

For more than a decade, I've helped innovators change the world through blockchain technology and digital assets. In recent years, I've simultaneously plunged into regenerative agriculture and rebuilding environmental ecosystems, communities, and human health by focusing on soil function. Thousands of family farmers are engaged in this struggle, losing ground rapidly with degraded topsoil, water shortages, climate change, and input cost increases. We somehow expect farmers to survive when they only receive, on average, 7.6 cents out of every \$1.00 spent on food in the United States.

Through my experience as both a blockchain lawyer and a farmer who converted my family farm into the first Regenerative Organic Certified farm in the southwest United States, I've become convinced the crypto community holds the power to dramatically accelerate regenerative agriculture. The world now has an entirely new, decentralized community and collection of tools, applications, philosophies, money, and wealth to apply to fundamental social and environmental agricultural infrastructure. In other words, we have an opportunity to rebuild agriculture, food production and distribution, and human health and nutrition from the soil up.

Most of you have expressed interest in regenerative agriculture. Many of you have built leading businesses, products, and protocols in the crypto industry. Some of you have built, or are building, the next generation of crypto tools, applications, and businesses specifically for regenerative agriculture. And some of you are

regenerative farmers, ranchers, and advocates who recognize the potential of crypto to accelerate your efforts.

I look forward to an engaging discussion with each of you.

Best regards,
