

A growing number of U.S. cities, including Las Vegas, Minneapolis and Chandler, Arizona, are re-examining their zoning, land use, and transportation regulations to ease the way forward for AVs.

Why it matters: Cities are exploring changes to decades-old laws in the hopes of attracting new technologies and investment as well as the economic and quality-of-life gains that come with them.

Context: According to a 2018 National League of Cities [report](#), roughly half of America's largest cities are "preparing for self-driving vehicles in their long-range transportation plans."
