

## **Cos. Making Hand Sanitizer Must Track FDA Guidance**

Amid the COVID-19 pandemic, many manufacturers are pivoting their production lines to make personal protective equipment and other much-needed supplies to aid consumers and healthcare professionals in the fight against the disease.

Recent examples include some clothing companies making masks and gowns, and certain auto manufacturers reconfiguring production lines to make face shields and ventilators. And with the nation facing a scarce supply of hand sanitizer, many businesses, from local distilleries to multinational fragrance companies, are lending a hand to increase hand sanitizer production.
