TEDxWoodside / Stanford, CA

TEDxWoodside

Partner Harvey Chen hosted the "A.I. and Her Lawyer's Troubles?" conversation during the TEDxWoodside: Regeneration program at Stanford University. TEDxWoodside is a community where people see, learn, and interact with unique ideas worth spreading. This event combined videos and live speakers to spark deep discussion and connection in a small group setting, focusing on how certain crises have significantly affected our lives. How do they change us? How should we deal with them? How do we *regenerate* in post-crisis times?

Topic: A.I. and Her Lawyer's Troubles?

With the ever-growing capability of artificial intelligence (AI), have you ever wondered if AI will get into legal trouble? What kind of legal issues will AI have? Why will AI need a lawyer? Is the law effective in limiting what AI can do? There is a fundamental issue lying underneath these questions. Harvey Chen discussed why he believes our future can be better if AI works both for us and with us.
