

China's internet watchdog, the Cyberspace Administration of China, has continued to tighten its regulation of internet industries and driven the formulation of many new laws and regulations in cybersecurity and data protection in China.

On March 17, 2022, the CAC reported to the public its campaign's achievements. These achievements showcased the determination of regulators to clean up improper activity on the internet and will serve as a deterrent to future inappropriate action, as well as guidance for proper conduct.
