Michael Glenn and guest host Andy Pettit visit the 2023 Austin Startup Week Crawl. Listen in as they meet and mingle with Austin's foremost startup entrepreneurs:

- Eve Vehicles—Drone network that can be safely deployed in an urban environment, allowing first responders to deploy the right resources to address a problem as quickly as possible.
- Advanced Telesensors—Provides completely touchless heart rate and respiratory rate sensing without the use of a wearable for everyday general wellness.
- Keywell.ai—Provides strategic data science and analytics services to help healthcare organizations improve outcomes and affect lives. It helps accelerate companies' initiatives and keep ahead of the analytics modernization curve.

- [Fastspring](#)—Helps software as a service (SaaS) and software companies sell online by handling every payment from subscription management to tax collection, remittance, and more.
- [Genetech Solutions](#)—Provides a complete suite of digital services that help companies grow, including web design, cybersecurity services, mobile applications, page speed optimization, and more.
- [Doseform](#)—Helps pharmacies automate manual tasks by providing AI-enabled workflow and patient engagement software.
- [NUTS](#)—Provides real-time heart rate, breath rate, and motion/occupancy status (which indicates movement, sleep, location, and lack of movement) in real time from your smartphone.
