

With the \$69 million sale in March of a non-fungible token by the artist Beeple, NFTs have become headline news. Putting aside the hype, NFTs represent a new, game-changing means for sports leagues, music companies, video game developers, and other media and entertainment companies to monetize their content in the digital age. The opportunities abound, but there are potential legal and regulatory hurdles to be considered and addressed before joining the NFT revolution.

In this webinar, we provided you with a primer on NFTs; topics to be covered include:

- What are NFTs and how are they created
- How NFTs may transform the media and entertainment industry
- An overview of the current NFT eco-system
- Key legal and regulatory issues surrounding NFTs

• Intellectual property considerations raised by NFTs

Webinar Recording CLE Form

Speakers include:

- John Delaney
 Technology Transactions & Privacy Practice
- Sarah Shtylman
 Technology Transactions & Privacy Practice
- <u>Divya Taneja</u> Technology Transactions & Privacy Practice
