How Crypto Regulation Could Change Under Trump and the New SEC

- *Perkins Coie partner previews crypto oversight next term*
- *New administration and SEC will raise industry profile*

President-elect Donald Trump has [pledged](#) to make the US “the crypto capital of the planet.” He envisions creating a Bitcoin strategic reserve, restoring crypto mining, and deregulating the sector.

Last month, Bitcoin reached a new milestone and [soared](#) to over [\\$108,000](#), sparking optimism for the future of cryptocurrency. Crypto leaders hope the new administration will work with the industry on rules rather than pursue regulation by enforcement.
